What is inside

2 **The verdict**
Your #1 ball, the three reasons it won, and its specs next to what your game asked for.

3 **Your top three**
#1, #2 and #3 side by side: what each runner-up does better and when it gets the nod.

4 **Fit by area**
Feel, cover, flight and compression scored for each pick, with the robot-test numbers behind them.

5 **The full field**
Where all the balls landed for your swing: the top 15 ranked and how the field spread.

6 **Near-misses and value picks**
Balls that nearly made it and why they fell short, plus cheaper balls that fit and the sale prices to watch.

7 **Caddie's notes**
How to play your new ball off the tee, into greens, around them, on the putter and in the cold.

8 **Smart Buy Plan**
What to buy first, where to buy it, and what a dozen should cost before you commit.

9 **What it is worth**
The strokes the right ball saves, what a season costs, and the signs it is time to re-fit.

10 **What else you own**
The Pro tools and partner apps that came with this report.

11 **How we score**
The six places points come from, the one penalty, our sources, and why no brand can buy a spot.

12 **Course and shop cards**
An 18-hole test card for one round and a wallet card with your three picks for the pro shop.

Fitted October 8, 2026 72 balls scored 2026 robot-test data

Titleist Pro V1x

Why this ball, in three reasons the engine can show its work on.

102 Compression	**Urethane** Cover
4-piece Construction	**$57.99** List price, dozen

Why it won

1. **Flight fit 100%.** Your current flight works, so the ball should not change it. At your speed it flies high off the driver, the window you already have.
2. **Cover fit 90%.** You want the ball to check a little around the green, but not at the cost of everything else. A urethane cover that ranked 2nd of 48 for pitch spin in the 2026 robot test.
3. **On the shortlist for 110+ mph.** Our research ranks it among the balls built for your speed group, and the robot test backs that up: 4th of 48 for total distance at 116 mph.

What your game needs, and what this ball has

Area	Your need	Titleist Pro V1x	Why it matters for you
Compression	High range	102 (high range)	Every swing compresses the core, so compression mostly sets feel and driver spin. Firmer balls tend to be a little faster off the driver.
Cover	Urethane	Urethane	You want the ball to check a little around the green, but not at the cost of everything else.
Spin	High	High off the driver, high on wedges	Nothing about your tee shots demands a specialty ball.
Flight	High	High off the driver	Your current flight works, so the ball should not change it.

Engine note: Expert-recommended for very fast swing speed (110+ mph) players. Urethane cover for premium feel and spin versatility.

Three balls, ranked, and how #1 beat the other two

All three clear the fit line for your swing, so the scores sit close. The order comes from where they differ, and the table shows exactly where.

#1

Titleist Pro V1x

99% match

The pick. Buy a sleeve of this first.

$57.99 list · 102 compression · Urethane

#2

Srixon Z-Star Diamond

99% match

The runner-up. Try it second, on the same holes.

$54.99 list · 93 compression · Urethane

#3

Callaway Chrome Tour X

98% match

Third. Worth a sleeve when the price is right.

$57.99 list · 99 compression · Urethane

How #1 beat each of them

Against	What it does well	Why #1 still wins	When it gets the nod
#2 Srixon Z-Star Diamond 99% to the 99% of #1	In independent robot testing, it flew straighter off the driver than your #1.	In independent robot testing, your #1 went farther off the driver.	On a windy day, its lower flight can get the nod.
#3 Callaway Chrome Tour X 98% to the 99% of #1	In independent robot testing, it flew straighter off the driver than your #1.	In independent robot testing, your #1 went farther off the driver.	On a windy day, its lower flight can get the nod.

Quick buy: a sleeve of each

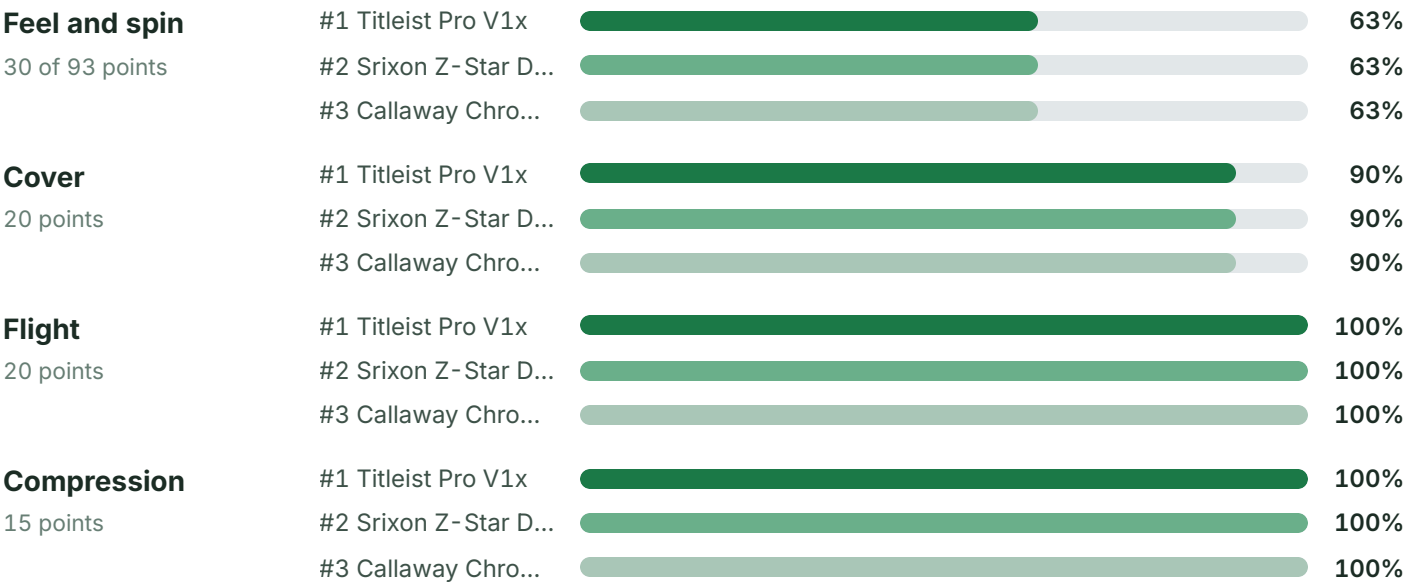

Three balls, not a dozen, so the one-round test on page 12 costs you a sleeve. Each link opens Amazon's results for a sleeve of that ball.

Affiliate links: they cost you nothing and never change which ball we name. No sleeve listed? Search Amazon for the ball's name and "sleeve".

#1	Titleist Pro V1x	Sleeve on Amazon
#2	Srixon Z-Star Diamond	Sleeve on Amazon
#3	Callaway Chrome Tour X	Sleeve on Amazon

Where each pick earns its score

The match score is built from four areas. Each pick's fit in every one, so you can see what you trade when you swap.

What the robot saw

The 2026 robot test, 48 balls hit by machine at three swing speeds. Driver numbers are from 116 mph, the test speed nearest yours. 1st is best.

Ball	Driver distance	Driver straightness	Pitch spin (35 yards)
#1 Titleist Pro V1x	4th of 48	23rd of 48	2nd of 48
#2 Srixon Z-Star Diamond	22nd of 48	12th of 48	3rd of 48
#3 Callaway Chrome Tour X	11th of 48	11th of 48	1st of 48

What each area means

Feel and greenside spin 30 points

How close the ball's feel and wedge spin sit to what you asked for.

Cover 20 points

Urethane or ionomer, judged against how much you need the ball to check.

Flight 20 points

Whether the ball holds the window you have, or moves it the way you want.

Compression 15 points

Core firmness against your swing speed and feel preference.

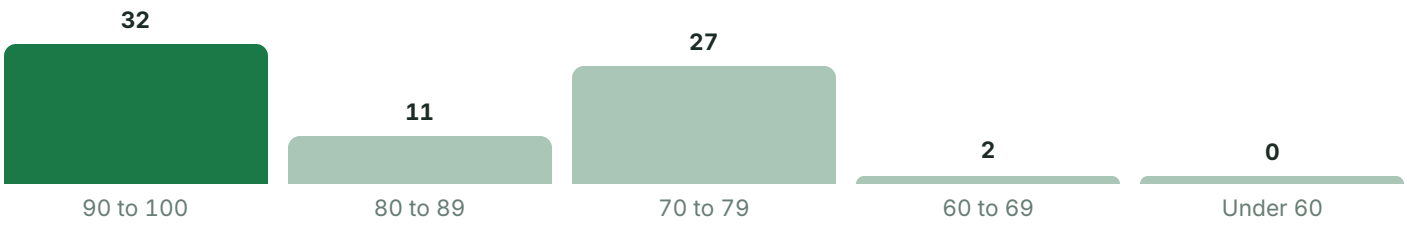

A ball the robot did not test is scored on its listed specs and our catalog research. The ranks come straight from the data the engine used to break ties.

The top 15 of 72

43 balls scored 80% or better for this swing, 29 did not. The top of the list, with the three the engine named in bold.

#	Ball	Match	List
1	**Titleist Pro V1x**	**99%**	**$57.99**
2	**Srixon Z-Star Diamond**	**99%**	**$54.99**
3	**Callaway Chrome Tour X**	**98%**	**$57.99**
4	Titleist Pro V1	98%	$57.99
5	Srixon Z-Star	96%	$54.99
6	TaylorMade TP5x	96%	$57.99
7	Bridgestone Tour B X	96%	$54.99
8	Srixon Z-Star XV	96%	$54.99
9	Wilson Staff Model	96%	$49.99
10	Callaway Chrome Tour Triple Diamond	96%	$57.99
11	Vice Pro Plus	94%	$41.99
12	Vice Pro Air	94%	$39.99
13	PXG Xtreme Tour X	94%	$39.99
14	Callaway Chrome Tour	94%	$57.99
15	Vice Pro	94%	$39.99

How the whole catalog scored

The balls that almost made it

Five balls scored within a few points of your top three. Each one is here with the reason it sits outside, so a sale price never surprises you.

Ball	Match	Why it is not in the three	List
Titleist Pro V1	98%	We picked the Pro V1x from Titleist instead, it scored 99% vs 98% for your spin and trajectory preferences.	$57.99
Srixon Z-Star	96%	We picked the Z-Star Diamond from Srixon instead, it scored 99% vs 96% for your spin and trajectory preferences.	$54.99
TaylorMade TP5x	96%	Scored 96%, just 2 points behind the #3 pick.	$57.99
Bridgestone Tour B X	96%	Scored 96%, just 2 points behind the #3 pick.	$54.99
Srixon Z-Star XV	96%	We picked the Z-Star Diamond from Srixon instead, it scored 99% vs 96% for your spin and trajectory preferences.	$54.99

Value picks

Close on the score, lower on the price. Worth a sleeve if $57.99 a dozen stings.

Ball	Match	List	vs #1
Vice Pro Plus	94%	$41.99	$16 less
Kirkland Signature Performance+	83%	$15	$42.99 less
Cut DC	90%	$29.95	$28.04 less

If one of these goes on sale

Anything on this page at 80% or better is a ball you can play without giving much back. Buy the sleeve, run the 3-hole test on page 8 against your #1, and let the shots decide. Below 80% the saving is usually paid back on the greens.

If you already play one of these

You are closer than most golfers. The gap to Titleist Pro V1x is a few points, and on the course that difference shows up on chips and pitches first. Test the switch there.

List prices are the reference price in our catalog, not the only price you can pay. Sleeves, sales and last year's model all move them.

Caddie's notes, shot by shot

What to expect from Titleist Pro V1x in each part of the game, and when to reach for #2 or #3 instead.

Driver
Off the tee

Expect a high flight with high spin off the driver at your speed. In the 2026 robot test at 116 mph it finished 4th of 48 for total distance and 23rd of 48 for left-to-right spread.

On a windy day, #2 (Srixon Z-Star Diamond) flies a notch lower. Keep a sleeve of it for those rounds.

Approach
Into the green

Your 7-iron carries 176 yards and you are happy with its height, so the ball's job is to hold that window. We scored #1 on a high flight for you: your current flight works, so the ball should not change it.

Your irons already stop close. A urethane cover keeps that on firm greens; an ionomer cover would give some of it back.

Chips and pitches
Inside 40 yards

You said greenside check matters (we scored your need medium). Titleist Pro V1x has a urethane cover and ranked 2nd of 48 for spin on a 35-yard pitch in the 2026 robot test.

You mix bump-and-runs with pitches. Judge the ball on the flown shots; the runners will look the same with any cover.

Putting and feel
On the green

You called putting your biggest weakness and asked for a soft feel. Titleist Pro V1x is a 102-compression ball and sits close to that ask (compression fit 100%).

Weather
Cold and wind

At 75°F you do not need a cold-weather ball. Below about 55°F every ball plays firmer and shorter, so re-fit in the app when your season turns.

None of your three is on our cold-weather list, so a winter round is the one time to look past them.

Your Smart Buy Plan

A $14 test before a $57.99 dozen. Four steps, then where to buy and what to pay.

1. **Buy one sleeve of your #1 first.**
   Three Titleist Pro V1x run about $14. Any pro shop or the stores on the right.

2. **Play it against your current ball.**
   Same three holes, one shot each, alternating, or let Caddie Mode in the app keep score over a real round. Judge chips and pitches first: the cover shows up around the green long before it shows up off the tee.

3. **Then buy the dozen.**
   About $57.99 at list. If a sleeve of #2 is on sale, it is a fair swap: it scored 99% for you.

4. **Re-check when the weather turns.**
   Below 55°F compression behaves differently. Re-fit in the app any time, free, for life.

Where to buy

- Your course's pro shop (ask for a sleeve, most will split a box).
- Golf Galaxy, DICK'S Sporting Goods, PGA TOUR Superstore.
- The brand's own online store.
- Amazon: search "Titleist Pro V1x golf balls". That link is an affiliate link; it costs you nothing and helps fund the free quiz.

Price guide

- Sleeve of 3: about $14.
- Dozen at list: $57.99. Shop two stores; prices move.
- Last year's model of the same ball is usually 20 to 30% off and plays nearly the same.

Reading the shelf

- Ask for a sleeve of Titleist Pro V1x by name. Most shops will split a box.
- Last year's model of the same ball plays nearly the same and is usually 20 to 30% off.
- Pick a number you do not already carry, so the test ball is never mistaken for the old one.
- Out of stock? Page 6 names the balls that scored within a few points.

Then take page 12 with you

A one-round test card to score the new ball against your current one, hole by hole, and a wallet-size shop card with your three picks, their list prices and what a sleeve should cost. Print the page or keep the PDF on your phone.

What the right ball is worth over a season

Our estimate for this swing, from the same engine that scored the field. Results vary.

2.5
strokes a round, estimated, from matching cover, flight and speed tier

50
strokes over a 20-round season at that rate

$150
what three dozen bought on a hunch at about $50 each costs, on balls that never fit

A dozen tour balls runs about $50. One wrong dozen costs more than this report did.

Where the strokes come from

Short Game	**1.2**	The right cover material changes how much the ball checks on chips and pitches. This is where the largest single block of your strokes is sitting.
Feel & Consistency	**0.5**	Compression mostly sets how the ball feels, and this matches the feel you asked for.
Ball Flight	**0.4**	A trajectory that suits your swing carries further and holds greens instead of running through them.
Speed Optimization	**0.4**	Your ball is on our shortlist of top picks for your swing speed group.

Re-fit when any of these happen

- A new driver or shaft (your spin and launch move).
- A lesson that changes your flight.
- Your handicap moves five shots either way.
- A cold snap: regular rounds below 55°F.
- A new model year of your ball. The engine updates when the data does.

Re-fitting is free, for life

Open the app, retake the 90-second quiz, and your report rebuilds against the current catalog. Caddie Mode lets you A/B your match over a real round, hole by hole, so the test card on page 12 can live in your pocket instead.

The 2.5-stroke challenge

Put Titleist Pro V1x in play for 30 days and let the scorecard decide. If it does not earn its place in the bag, the report has a 30-day money-back guarantee, so the test costs you a sleeve.

What else comes with this report

Pro in the BallCaddie app, 4 partner apps for life, and 2 more reports. Everything on this page is included at $29, one payment.

BallCaddie Pro

- Your top 3, named, with the reasoning behind each pick

★★★★★

"I wish I'd done this years ago."

I spent too much money jumping balls because of a YouTube review, a buddy, or whatever was on sale. BallCaddie recommended one based on my game.

Alex M., Buffalo, New York. Full Unlock buyer. Results vary.

★★★★★

"I bought it for the ball. PracticeCaddie was the surprise."

I paid $29 to find out which ball I should play. I wasn't looking for anything else.

Oscar S., Leicester, Great Britain. Full Unlock buyer. Results vary.

★★★★★

"This is more than a golf ball fitting."

The #1 ball was worth it. What sold me on Full Unlock was the two alternatives and why each one fit, instead of one name and a logo.

Sonny A., Fort Wayne, Indiana. Full Unlock buyer. Results vary.

The partner apps are sister apps from GameCaddie.com, the company behind BallCaddie. Each is its own download, unlocked by the email on your purchase. The two reports download instantly from your results page in the app.

How the score is built

Every ball starts at zero and earns points in six places, 93 possible, with one penalty. Your match is that score as a share of the best any ball could earn for your answers, scaled so your #1 reads 97 to 100; every other ball sits on the same scale, so its number says how far behind your #1 it is.

Feel and greenside spin	How close the ball's feel and wedge spin sit to what you asked for.	**30**
Cover	Urethane or ionomer, judged against how much you need the ball to check.	**20**
Flight	Whether the ball holds the window you have, or moves it the way you want.	**20**
Compression	Core firmness against your swing speed and feel preference.	**15**
Speed-tier shortlist	A bonus for balls our research ranks for your swing speed.	**5**
Brand	A small nod to brands with the deepest fitting data.	**3**
Straightness off the tee	A penalty, not a bonus: a ball among the widest left-to-right off the driver in the robot test at your speed loses 1 point, 2 if you asked for straighter drives.	**-2**

Sources. Ball specs (compression, layers, cover) are the manufacturers' published numbers. Driver distance, left-to-right spread and 35-yard pitch spin ranks are from an independent 2026 robot test of 48 balls at 86, 102 and 116 mph. The speed-tier shortlist is our own research across 72 balls from 19 brands.

Independence. BallCaddie does not sell golf balls and takes no money from any brand. Retailer links in this report may be affiliate links; they never change which ball we name. Strokes-saved figures are estimates from our model and results vary.

These same 12 pages, built for your swing.

Your #1, #2 and #3 by name, the why, the buy plan and everything above. $29 once, less than a dozen tour balls. Already playing the right ball? The report says so, and you can ask for your $29 back.
